

Taisiya Sikorskaya

Assistant Professor of Finance

University of Chicago Booth School of Business ◊ 5807 South Woodlawn Avenue, Chicago, Illinois 60637

Academic Positions	University of Chicago Booth School of Business, United States Assistant Professor of Finance, 2024 - present
Education	London Business School, United Kingdom PhD in Finance, 2024 London Business School, United Kingdom MRes in Finance, 2019 University of St. Gallen, Switzerland MA in Quantitative Economics and Finance, 2017 Chelyabinsk State University, Russia Diplom (MSc) in Mathematical Methods in Economics and Operations Research, 2013. <i>Distinction</i>
Published Papers	<u>Institutional Investor Mandates, Securities Lending, and Short-Selling Constraints</u> Accepted in <i>the Journal of Financial Economics</i> . Institutions facilitate short-selling by lending from their holdings, but what they hold is endogenous. This paper examines how institutional demand, driven by investment mandates (benchmarking), affects short-selling. In a model where benchmarked managers lend from their holdings, both lending supply and equilibrium price are higher for the benchmark asset, and so is shorting demand (due to inflated price). A quasi-experiment using Russell index reconstitution shows that stocks with more benchmarked capital have greater lending supply and demand. Ultimately, such stocks are <i>costlier</i> to short. In theory and data, results are driven by incomplete pass-through from benchmarked capital to lending supply. <u>Strategic Arbitrage in Segmented Markets</u> (with S. Bryzgalova and A. Pavlova). <i>The Journal of Financial Economics</i> , 166, 2025. We propose a model in which arbitrageurs act strategically in markets with entry costs. In a repeated game, arbitrageurs choose to specialize in some markets, which leads to the highest combined profits. We present evidence consistent with our theory from the options market, in which suboptimally unexercised options create arbitrage opportunities for intermediaries. Using transaction-level data, we identify the corresponding arbitrage trades. Consistent with the model, only 57% of these opportunities attract entry by arbitrageurs. Of those that do, 49% attract only one arbitrageur. Finally, our paper details how market participants circumvent a regulation devised to curtail this arbitrage strategy. <u>Retail Trading in Options and the Rise of the Big Three Wholesalers</u> (with S. Bryzgalova and A. Pavlova). <i>The Journal of Finance</i> , 78(6), 2023, pp. 3465-3514. We document a rapid increase in retail trading in options in the U.S. Facilitated by payment for order flow (PFOF) from wholesalers executing retail orders, retail trading recently reached over 60% of the total market volume. Nearly 90% of PFOF comes from three wholesalers. Exploiting new flags in transaction-level data, we isolate wholesaler trades and build a novel measure of retail options trading. Our measure comoves with equity-based retail activity proxies and drops significantly during U.S. brokerage platform outages and trading restrictions. Retail investors prefer cheaper, weekly options, with the average bid-ask spread of a whopping 12.6%, and lose money on average. <u>Benchmarking Intensity</u> (with A. Pavlova). <i>The Review of Financial Studies</i> , 36(3), 2023, pp. 859–903. <i>Editor's Choice</i> . Benchmarking incentivizes fund managers to invest a fraction of their funds' assets in their benchmark indices, and such demand is inelastic. We construct a measure of inelastic demand a stock attracts, benchmarking intensity (BMI), computed as its cumulative weight in all benchmarks, weighted by assets following each benchmark. Exploiting the Russell 1000/2000 cutoff, we show that changes in stocks' BMIs instrument for changes in ownership of benchmarked investors. The resulting demand elasticities are low. We document that both active and passive fund managers buy additions to their benchmarks and sell deletions. Finally, an increase in BMI lowers future stock returns.
Working Papers	<u>The Hidden Cost of Stock Market Concentration: When Funds Hit Regulatory Limits</u> (with L. Pastor and J. Wang). <u>Sparse Portfolios and Benchmarking in Corporate Bond Markets</u> (with Z. Li and A. Pavlova). <u>Two APs Are Better Than One: ETF Mispricing and Primary Market Participation</u> (with E. Gorbatiukov)

Refereeing	Journal of Finance; Journal of Financial and Quantitative Analysis; Journal of Financial Economics; Journal of Empirical Finance; Management Science; Review of Asset Pricing Studies; Review of Finance; Review of Economic Studies; Review of Financial Studies
Program Committee	European Finance Association; SFS Cavalcade North America; Western Finance Association
Discussions	AFA, AFBC, FIFI, FMA Derivatives, MFA, Red Rock
Conferences	Chicago Booth Asset Pricing Conference
Awards and Honours	BlackRock Research Award at the Australasian Finance and Banking Conference, 2025 <u>Top Finance Graduate Award, 2024</u> <u>Colorado Finance Summit Best Paper Award, 2023</u> <u>European Economic Association Econ JM Best Paper Award, 2023</u> <u>AQR Asset Management Institute Fellowship Award, 2022</u> <u>Professor Sir James Ball PhD Award, London Business School, 2021</u> <u>Fellowship for Doctoral Students, London Business School, 2017-2023</u> <u>The STARR International Foundation Grant, Switzerland, 2013-2014</u> The President of Russia Award for Outstanding Students (awarded twice), 2012 The City Administration Award (Chelyabinsk, Russia), 2010
